

Elevator Equipment Corporation

"Simplicity in Motion"

EECO Group One Package

Elevator Equipment Corporation offers two types of Group One elevator systems. Both system types can include a jack unit, pit support/buffers, power unit, controller, hatchway switches, wiring materials, sling, platform, shoes, guide rails, rail brackets, oil line material, and engineering layout drawings.

The first type is the [Group One Standard Model](#). This a group of five standard size and capacity pre-engineered systems which offer minimum lead times.

The second type is the [Group One Custom model](#). This elevator system is designed around your specific job requirements.

Both types are available in either in-ground or holeless configurations. All EECO Group One systems are designed and manufactured in accordance with the Safety Code for Elevators & Escalators, ASME A17.1. [More Information](#)
