UV-5AT VALVE TRAINING SIMULATOR

Cuts Training Time and Costs by Providing “Hands On” Training with an Actual UV-5AT Valve

Ideal for training construction, repair, and service personnel. Completely portable, rolls on casters and fits through standard doors. Reacts like a normal elevator to provide hands-on training for valve adjustments, repairs, or replacement. The UV-5AT valve can be completely disassembled without removing it from the simulator.

Ships with our Valve Adjustment Kit

Simulator Features

- Includes valve, pump, motor and jack assembly
- Adjustable slow down and stop switches
- Portable constant pressure push button control
- Plugs into any 110VAC, 10 AMP wall socket
- LED lights indicate energized/de-energized coil condition
- Casters for ease of movement
- Total weight - 825 lbs.
- Dimensions - 55" Wide x 28" Deep x 54" High
